

As part of the Graduate School's "Building Graduate Communities Initiative" the Program in Public Health presents:

Health Risks and Benefits in the Long Island Study of Seafood Consumption: Early Findings

Presented by Dr. Jaymie Meliker

Jaymie R. Meliker, Ph.D., is an Associate Professor in the Program in Public Health and Department of Preventive Medicine at Stony Brook University. His scholarship falls into two lines of inquiry: (1) identifying environmental factors that play important roles in disease morbidity, and (2) developing methods that improve our ability to investigate exposure-disease relationships. He has published on drinking water contaminants, air pollutants, mercury, cadmium, arsenic, asthma, osteoporosis, cardiovascular disease, and cancer, and enjoys tackling methodological problems to advance population health.

Dr. Meliker received his B.A. from Oberlin College, and earned M.S. and Ph.D. degrees in Environmental Health Sciences at the University of Michigan School of Public Health. In addition to his work within academia, he worked at BioMedware, Inc., a small research firm in Ann Arbor, Michigan and before that worked as a Sustainability Consultant for the Center for Maximum Potential Building Systems in Austin, Texas.

Thursday, February 6th 4:00PM, HSC Level 2 Room
408 (SHTM Large Conference Room)
Refreshments will be served.

RSVP by February 3rd to
