

STONY BROOK UNIVERSITY

PROGRAM IN PUBLIC HEALTH

ACADEMIC YEAR 2018-2019

Stony Brook Medicine
Program in Public Health

PPH PRACTICUM MANUAL

PPH PRACTICUM MANUAL

PROGRAM IN PUBLIC HEALTH

Accredited by CEPH in 2008

Introduction

This document is intended to help guide you, the Master of Public Health (MPH) degree candidate, in selecting and completing the Practicum required by the *Program in Public Health*. It provides clear and concise information on the Practicum experience to guide you, your Faculty Supervisor, and Practicum Preceptor.

The Practicum is an essential part of the *Program in Public Health* curriculum and is intended to provide hands-on experience in the field of public health. The Practicum aims to provide you with opportunities to apply and test public health concepts and theories in practical settings and improve your learning related to the Program's public health competencies. The Practicum accounts for 3 academic credits.

The Practicum must be conducted in partnership with an agency or organization (hereafter 'the Practicum Organization') that is providing a public health service, in the broad sense of public health. The Practicum Organization may be a public health department or a non-governmental agency. The Practicum process is overseen by the MPH Practicum Coordinator, who ensures that all requirements of the Practicum are met. For the purpose of the practicum, it is required that you develop a supervisory team, which will help you define, plan, and implement the Practicum. The team consists of a Faculty Supervisor, who is a Core Public Health Faculty member, and a Preceptor, who works in the Practicum Organization.

Ethical and professional conduct is essential. As an individual training to be a public health professional, you are expected to conduct yourself ethically and professionally according to the standards of the *Program in Public Health*, Stony Brook University, and the Practicum Organization.

The purpose of the Practicum is to blend practical field experiences with academic learning. The Practicum is defined as the process and product resulting from a planned, supervised practical experience, strategically designed to provide an opportunity for you to support and apply your academic knowledge and acquired skills to a specific project in the public health arena.

**The Practicum must meet the mission of student's MPH concentration:
Health Analytics, Health Policy & Management, or Community Health.**

The mission of each concentration is outlined below.

- **Health Analytics:** The mission of this concentration is to prepare public health professionals with the analytical, research, and statistical skills necessary to benchmark and evaluate health improvement initiatives in community and health care settings. Increasingly, the health field is challenged to adopt an evidence-based approach to

preventing and treating disease and disability. The mission is considered met if the student applies research, statistical, and/or problem-solving skills that the Practicum Organization finds valuable or beneficial.

- **Health Policy & Management:** The mission of this concentration is to provide students with the policy background, knowledge and skills that will be particularly useful in advancing careers involving management functions in health and healthcare related organizations. Courses address economics, policy and principles of management. Some courses in this concentration are offered in collaboration with Stony Brook's College of Business.
- **Community Health:** The mission of this concentration is to prepare students for community-based work in public health. Students will acquire skills and knowledge related to planning, implementing, and evaluating community health improvement projects and interventions. They also will learn the principles of community-based participatory research and community engagement. The mission is considered met if the student performs a Practicum related to planning, implementing, or evaluating community health improvement projects or interventions for a Practicum Organization.

Public Health Competencies & the Practicum

The curriculum for the MPH degree is competency-based in order to comply with current efforts to improve the quality and accountability of graduate public health education and training.

Identifying competencies helps to ensure that public health programs achieve a workforce that can deliver the essential services of public health, which are to:

- Monitor the health status of the community
- Investigate and diagnose health problems and hazards
- Inform and educate people regarding health issues
- Mobilize partnerships to solve community problems
- Support policies and plans to achieve health goals
- Enforce laws and regulations to protect health and safety
- Link people to needed personal health services
- Ensure a skilled, competent public health workforce
- Evaluate effectiveness, accessibility and quality of health services
- Research and apply innovative solutions

To ensure that all students have a broad understanding of the basic areas of public health, every student is required to complete all MPH Core courses satisfactorily. The MPH Core courses convey the CEPH-identified Foundational Competencies and the PPH program-specific concentration competencies through associated Learning Experiences. You, the student, receive training in the five traditional, public health core knowledge areas: biostatistics, environmental health, epidemiology, health policy and management, and the social and behavioral sciences, which inform the competencies. The Health Analytics, Health Policy & Management and Community Health concentrations also have concentration-specific competencies and learning experiences. A complete list of the CEPH-identified Foundational Competencies and the PPH program-specific Concentration Competencies with Learning Experiences, can be found on our website at:

<http://www.stonybrookmedicalcenter.org/gpph/academics/competencies>.

You should choose a Practicum that is consistent with your career objectives and conducive to building professional relationships with relevant public health organizations. Thereafter, you

should identify the Foundational, and program-specific Concentration Competencies and related Learning Experiences, that will be strengthened through the Practicum.

At least five competencies, of which at least three must be Foundational Competencies, must be addressed during the Practicum experience.

By the time you are ready to begin your Practicum, you will have been introduced to and developed many of these skills or competencies through MPH coursework; many are addressed at least partially in more than one course. To assess your acquisition of these skills and to help determine your progress in developing as many public health competencies as possible, you must consider the competencies addressed throughout the entire Practicum process: from planning through writing of the final Practicum Report.

Selecting a Practicum

Your consideration of a suitable Practicum topic and a Practicum Organization may begin with a conversation with a fellow student or faculty member, while reading a journal article, or sparked by circumstances in your workplace. You should develop and obtain feedback about your ideas from the Practicum Coordinator, who can help focus the Practicum and suggest possible resources and sites. The topic you decide on should coincide with your own interests, concentration, and educational and career goals. For example,

- A student in the Health Analytics concentration may choose to perform an epidemiological investigation of a public health problem identified by the Practicum Organization as important to its goals, or perform statistical analyses using data collected by the Practicum Organization about a public health-related subject and report the results to the Organization when complete.
- Alternatively, a student whose concentration is Community Health may choose to design a health-related community intervention for the Practicum Organization. Design of a program would include identifying needed resources and activities and creating procedures, manuals, or educational materials. Another Community Health Practicum might lead to a student's implementation of a program already planned for the Practicum Organization or undertaking an evaluation of the Organization's existing public health programs to assess effectiveness and outcomes.
- The Health Policy & Management student might consider a Practicum like those listed above, or might choose to develop a health policy position paper or analyze the health characteristics of a community or defined population for the Practicum Organization.

Practicum Enrollment

- Permission to enroll in HPH 580 is at the discretion of the Practicum Coordinator. You should meet with the Practicum Coordinator early in the planning of your Practicum project. The Practicum Coordinator will help you to make sure that your proposal satisfies Practicum criteria. The Practicum Coordinator may also schedule small-group meetings with you and other students to facilitate development of the proposal and completion of the Practicum.
- It is preferred that you enroll in HPH 580 in the semester in which you expect to complete the Practicum. If you register for HPH 580 and do not complete the Practicum in that semester, you must arrange with the Practicum Coordinator to receive an Incomplete, which will be substituted with a grade when you have fulfilled the requirements of the Practicum in a subsequent semester. Please **Practicum Grading** section for more information.

Practicum Time Commitment & Timing

Proposal Planning: You are expected to attend a Practicum Overview Session with the Practicum Coordinator. Sessions will be scheduled each fall semester.

Practicum Time Commitment: You must complete a minimum of 135 hours on the Practicum project, and this work can be performed in a short period of time or be carried out over a period that spans more than one semester. The timeline developed for your Practicum Proposal will describe how you, your Preceptor, and your Faculty Supervisor have agreed to time the key facets of the work. You may spend all 135 hours at the Practicum Organization or perform the work of the Practicum outside the organizational setting, depending upon the needs of your project.

Practicum Timing:

- If you are a full-time MPH student (i.e., you plan to complete coursework requirements for the MPH degree in 18 months to two years), you should begin planning your Practicum no later than two semesters prior to when you intend to graduate, with the goal of implementing your Practicum in the semester immediately prior to graduation.
- If you are a part-time MPH student (i.e., you are attending the Program on a part-time basis, including MD or DDS students), you should consider starting your Practicum after you have completed the MPH Core Courses, or after you have obtained written approval from the Practicum Coordinator, who will consult first with your Faculty Supervisor.
- If you are working full-time, you should investigate with your employer ways to accommodate the time needed to devote to the Practicum. You may need to negotiate the use of vacation time, a flexible work schedule, or other arrangement with your employer. Consider whether you will need Institutional Review Board (IRB) approval for your project. This requires an application to the Committees on Research Involving Human Subjects (CORIHS). If you need CORIHS approval, you will need to adjust your timeline appropriately since obtaining approval from CORHIS usually takes several months.

Conducting your practicum at your regular place of employment

You may conduct your Practicum in your regular place of employment if it is an acceptable Organization for the purposes of Practicum. You may do this as long as the Practicum extends beyond (i.e., does not include) your normal job duties and you do not receive any type of compensation for it..

Practicum Requirements

See **Appendix A: Suggested Sequence and Checklist**

See **Appendix B (separate document): Practicum Forms**

- Form A: Memo to Preceptor (to be signed by Preceptor)
- Form B: Practicum Team Information
- Form C: Practicum Proposal (to be signed by Preceptor, Student, and Faculty Advisor)
- Form D: Practicum Logbook
- Form E: Interim Practicum Review (if applicable)
- Form F: Preceptor's Evaluation
- Practicum Final Report, Deliverables (as described in Form C: Practicum Proposal), slide set for presentation to the practicum organization, copy of poster for the PPH practicum event.
- Practicum Reflection

- Form G: Faculty Supervisor's Evaluation

Practicum Proposal

Once you have selected a topic or project for your Practicum, you must write a Practicum Proposal. The proposal must be typed onto *Form C: Practicum Proposal*, and approved and signed by your Preceptor, Faculty Supervisor, and Practicum Coordinator. **You are expected to submit a draft of your proposal to the Practicum Coordinator no later than 6 weeks from the time you have registered for Practicum.**

The Practicum Proposal must contain all of the following elements:

- Background
- Project Description
- Goals & Objectives
- Competencies Addressed
- Resources (if applicable)
- Timeline

See **Appendix C: Practicum Proposal Outline** for more information.

Practicum Final Report & Deliverables

The practicum final report is a concise summary (in the past tense) of why the work was done, the goals and objectives, the methods by which these were achieved and evaluated, related products that were created, results (link each of the results to the specific goals/objectives, in a systematic manner), a discussion of the impact of the practicum activity, and recommendations for future activities to the sponsoring organization and/or the field, and/or research. If there were any deviations from the plan as described in the proposal (such as changes in methods, timeline, or other modifications), these should be noted in the final report as well with a discussion of why modifications were necessary.

The Practicum Final Report must contain all of the following elements:

- Introduction
- Methods
- Results
- Discussion and Conclusions
- Reference List
- Appendices (Deliverables, slide set, poster)
- Evaluation of the Practicum

See **Appendix D: Final Practicum Report Outline** for more information.

As a requirement outlined by CEPH, at least two products or "deliverables" must be included in your practicum portfolio. **The practicum "products" or "deliverables" should be placed in an appendix (as noted above), and referred to within the content of the final report.** One of the deliverables can be a slide set prepared as a distillation of the final report and presented to the practicum organization. The poster prepared for the PPH Practicum Event does not count as a deliverable.

Practicum Grading

Upon successful completion of the course requirements of the Practicum, you will receive academic credit that will apply toward fulfilling the MPH degree requirements. The Practicum is graded. The Practicum grade is determined by your Faculty Supervisor and reflects your performance throughout the practicum activity. The quality of your proposal, your Preceptor's evaluation, your self-evaluation, and your Practicum final report and deliverables are also considered in your grade.

Please note that you are expected to complete the Practicum by the end of the semester you are enrolled in Capstone. If you have not submitted all of the required forms, final report, and deliverables within six weeks of Capstone completion, the Practicum grade may be reduced by half a letter grade.

Relationship of Practicum to Capstone Seminar

The Practicum is distinct from the Capstone Seminar, with each course earning three academic credits. An approved Practicum should precede the Capstone Seminar since you will learn how to write an abstract and develop an effective poster presentation based on your Practicum project as part of your Capstone Seminar requirements.

Practicum Presentation Event

All students are required to present the poster developed during Capstone, at the annual PPH Practicum Presentation Event held during the Spring semester.

Practicum Waivers

The practicum is a CEPH requirement for graduation from our accredited program. , No waivers of the Practicum requirement will be considered.

Responsibilities of the Student, Practicum Coordinator/Assistant Director for Student Affairs Preceptor & Faculty Supervisor

Student

You are responsible for identifying a Preceptor, developing the Practicum Proposal to the satisfaction of the Preceptor and Faculty Supervisor, ensuring the completion and delivery to the Practicum Coordinator of all forms required for the Practicum, completing the Practicum deliverables that were described in the Practicum Proposal, and presenting your practicum at the PPH Practicum Event.

Upon approaching a potential Practicum Organization and Preceptor, you must provide that person with *Form A: Memo to Preceptor* which is to be signed and returned to the Practicum Coordinator. When you have selected a Practicum topic and team, you will complete *Form B: Practicum Team Information* and *Form C: Practicum Proposal*, which requires the signature of your Preceptor and Faculty Supervisor. You will submit these forms to the Practicum Coordinator for signature.

You should meet regularly with your Preceptor and Faculty Supervisor during your Practicum. Review progress and problem-solve as necessary. Adjust your Practicum goals, objectives, and/or timeline, if necessary. **Complete Form E: Interim Practicum Review only if the Practicum changes substantially from your approved proposal.** Submit the completed *Form E* to the Practicum Coordinator. When the Practicum project is complete, submit a copy of the deliverables to your Preceptor, along with *Form F: Preceptor's Evaluation*. Submit *Form F* when your Preceptor has completed it, along with *Form D: Practicum Logbook*, *Form G: Self-Evaluation*, and *Form H: Practicum Final Report with deliverables* to the Practicum Coordinator.

Send a thank you note to your Preceptor. Note cards are supplied by the Program in Public Health and can be requested at the front desk of the PPH suite. Once completed, return the card in an addressed envelope back to the front desk. The Program in Public Health will supply postage.

Practicum Coordinator and Assistant Director for Student Affairs

The Practicum Coordinator and Assistant Director for Student Affairs have the following responsibilities:

- Provide you with a copy of the Practicum Manual and all required Practicum Forms.
- If needed, meet with you to brainstorm possible Practicum projects.
- Provide a list of possible Practicum Organizations with contact persons.
- Provide information on the CORIHS process, if necessary.
- Help you identify a Faculty Supervisor for your Practicum.
- Communicate with your Preceptor to establish an agreement with the Practicum Organization that will allow you to complete the Practicum at that site, in the form of a memorandum of understanding or detailed letter that will serve as such.
- Intercede on your behalf where necessary to clarify your and your Preceptor's roles and facilitate understanding and agreement as to goals, conduct, commitment, and deliverables.
- Facilitate distribution of your Practicum deliverables
- Ensure that all requirements of the Practicum are met.
- Ensure that you receive a grade for HPH 580.

Preceptor

The Preceptor should be a skilled practitioner willing to serve as the student's mentor and guide, providing practical experience and supervision for the Practicum project. The Preceptor has the following responsibilities:

- Be engaged in work that will help you fulfill the requirements of the Practicum.
- Provide an overview of the Practicum Organization, including its organizational composition and mode(s) of operation, mission, goals, and activities, and target population(s).
- Orient you to Practicum Organization policies and procedures relevant to your work with the organization
- Provide necessary organizational resources for project, including any pertinent reports.
- Allot adequate time to spend with you and provide periodic and timely feedback and guidance to you through regularly scheduled meetings, formal evaluation, and/or other means outlined in your Practicum Proposal.
- Review and comment on your Practicum deliverables through completion of *Form F: Preceptor's Evaluation*.

Faculty Supervisor

The Faculty Supervisor for your Practicum should have expertise and interest in your Practicum topic, and provide practical and academic guidance to you. The Faculty Supervisor has the following responsibilities:

- Meet with you during the Practicum planning phase to discuss possible opportunities and help you to choose a project that will be most suitable for your educational goals.
- Help you set attainable goals and objectives for the Practicum, and establish a realistic timeline.
- Review your practicum proposal and approve the final version.
- Meet with you regularly to discuss progress and help resolve any problems as you conduct the work of your Practicum, and advise you on adjusting your Practicum goals, objectives, and/or timeline, if necessary.
- Assure the quality of the Practicum final report and deliverables.

- Review your Practicum final report and deliverables, *Form F: Preceptor's Evaluation*, and *Form G: Student's Self-Evaluation*, and grade your Practicum.

Appendix A: Suggested Sequence and Checklist

Summer/Fall Prior to Practicum

- Identify Project and Preceptor, submit Memo to Preceptor and Team Information
- Schedule meeting with Practicum Faculty Advisor
- Attend a Practicum Overview Session with Practicum Coordinator
- Complete Proposal Paperwork
- Proposal to be reviewed by Practicum Faculty Advisor
- Approved Proposal reviewed and signed by Faculty Advisor, Preceptor, and Practicum Coordinator
- Enroll in Capstone, permission provided by Assistant Director for Student Affairs

During Practicum work and enrollment in Capstone

- Interim meetings with Faculty Advisor
- Submit Interim Practicum Review (if applicable)
- Prepare Practicum presentation in Capstone
- Presentation for PPH Practicum Event

When Practicum is Complete

- Final Report and deliverables to be reviewed by Practicum Faculty Advisor
- Preceptor to complete Preceptor's Evaluation
- Faculty Supervisor to complete Faculty Evaluation
- Send Thank You Note to Preceptor (stationary and postage can be obtained through the PPH office)
- Submit Logbook
- Submit Final Report, reflection, and deliverables*

Appendix C: Practicum Proposal Outline

Background

The Practicum Proposal should contain a Background section, which will:

- Describe the public health service that your Practicum Organization provides.
- Identify the Practicum Organization's problem, question, or issue related to this public health service that your Practicum will address (the "what").
- Identify the importance of the problem, question, or issue to the Practicum Organization (the "why").
- Describe your Preceptor's role in providing the public health service and relationship to the problem, question, or issue the Practicum will address (the "who").
- Discuss how the Practicum relates to the mission of your concentration: Health Analytics, Community Health, or Health Policy & Management.

Project Description

The Practicum Proposal should summarize what the Practicum is intended to accomplish and how you plan to go about this. Describe how you will address or answer the problem, question, or issue (the "how"). As a part of the description, be sure to include sections on the methods, data sources (and procedures to access these data sources if not publicly available), and measures you will use to complete the Practicum.

Goals & Objectives

The Practicum Proposal should state the goal(s) for the Practicum and the associated objectives. Your goal(s) and objectives will be the basis for evaluating your performance during the Practicum.

Goals are broad, generalized statements about what you want to achieve, the "targets" to be reached. Objectives are the steps you take to reach your goal(s). Objectives should be SMART: specific, measurable, attainable, relevant, and time-limited. Each objective should begin with an active verb, for example, identify, define, develop, investigate, prepare, write. "The goal is where we want to be. The objectives are the steps needed to get there."

One of the objectives must identify the "products" or "deliverables" of the Practicum, for example, a research report, program implementation plan, program evaluation plan, community health curriculum. One of the objectives must be a presentation to the relevant audience for the Practicum project, which will usually be within the Practicum Organization.

If Institutional Review Board (IRB) approval is required to complete the Practicum, one of the objectives will be to complete the application to the Committees on Research Involving Human Subjects (CORIHS), the University's on-site IRB, with responsibility for protecting the rights and welfare of human subjects involved in research. See the CORIHS website for information about conducting research at Stony Brook University and the compliance-related forms needed to apply for IRB approval of research projects at:

<http://www.research.sunysb.edu/humans/humansubjects.html>.

Competencies Addressed

The Practicum Proposal must identify the Competencies which will be strengthened through the Practicum experience. **At least five competencies, of which at least three must be CEPH-identified Foundational Competencies, must be addressed during the Practicum experience.**

Resources Required (if applicable)

Timeline

The Practicum Proposal must include a timeline that estimates how long it will take to complete each objective including the “products” or “deliverables” of the Practicum and the presentation you will make at the conclusion of the Practicum. Include an estimate of the number of hours that it will take to complete each step in the process, which will total to a minimum of 135 hours (equivalent to 3 credits).

Appendix D: Final Practicum Report and Evaluation of Practicum

As a requirement outlined by CEPH, at least two “deliverables” or “products” must be included in your practicum portfolio. This includes a presentation (slide set) to the relevant audience for the Practicum project, which will usually be within the Practicum Organization.

The major narrative divisions of the practicum final report are described below:

Introduction

Describes why the work was done. Describe the problem or need on which the practicum was based, the historical background of this problem or need, and any earlier efforts made for addressing the problem. An important aspect of the **Introduction** is a review of the pertinent literature. Few problems or needs are unique: many have already been investigated or planned and it is helpful to find how this was accomplished, what alternatives were tried or considered, and what the results were.

Methods

The methods section includes a complete description of methods and procedures used in the practicum, to carry out the goals and objectives. Credit should be given to individuals who developed the methods, procedures, tests or concepts you will employ by means of literature citation. Goals and behavioral objectives, strategies utilized, implementation difficulties encountered, computational techniques employed, and criteria used to evaluate are described and discussed in this section.

Results

This section describes the results and findings of the problem or the effectiveness of a developed or implemented program, however tentative they may be.

Discussion and Conclusions

The most important function of this section is to link the results of the practicum to your original problem or proposed program. All conclusions and recommendations resulting from the practicum are discussed in this subsection. They should be discussed in terms of their implications for the problem or program that originally motivated the work. For example – returning to the earlier example of developing a procedures manual – the original problem might have been recurring procedural failures within the institution. You will then discuss the manual you developed (your “results”) in terms of its ability to prevent or mitigate such failures. For example, reflecting on the problem and proposed solution, do you have suggestions to the Practicum Organization regarding the tools they provided to you? Any limitations on the interpretation of the findings or obstacles in program development or evaluation are also discussed in this section.

Reference List

Use APA referencing style to provide proper citations.

Appendices (Deliverables)

These include all data collection tools / measures (such as surveys, questionnaires, or chart abstraction tools) primary data (not raw data), and other products (curriculum, training manuals, power point presentations, flyers, reports to the sponsoring agency) and other relevant materials developed, used or evaluated in the project. The appendices provide a copy of the final deliverables or products, which must be properly labeled and referenced in the body of the final report. Education projects should include all curricular materials including objectives, teaching

strategies, evaluations and related instructional aids. There is no limit to the number of appendices included in the final report.

Evaluation of the Practicum

Please write a 2 - 3 page reflection of your practicum experience. You should reflect on the following:

- a. Overall, how would you rate your Practicum experience? Please explain your response.
- b. If you had the opportunity to do the practicum over again, would your approach be the same or differently? Explain.
- c. Reflecting on the competencies you selected in your Practicum Proposal, do you feel the attainment of those competencies has been strengthened through this practicum? Explain your response.
- d. How would you rate the supervision of your Preceptor? Please explain your response.
- e. What impact, if any, do you anticipate your practicum experience will have on your practicum placement organization? Explain your response.
- f. What impact, if any, do you anticipate your practicum experience will have on your career path? Explain your response.
- g. What recommendations do you have to the Program in Public Health's faculty/staff to help prepare for or improve the practicum experience?
